## Boat Highlights

First introduced on the original Gemini 105M, the hull shape of the 105Mc is still revolutionary in the multihull industry. The hulls of the Gemini 105Mc are shallow and shaped much like a "teardrop" which requires little force to move the 105Mc through the water yet it also provides a high load carrying capacity (450 lb per hull per 1"). The bridge deck has 39" of clearance at the bow. This, combined with the lack of pitching and wave making, translates to a comfortable ride with no heeling. The shape has been tested and proven in a wide variety of conditions... surfing down 30' waves in the mid-Atlantic, sailing to Hawaii, or cruising down the Intracoastal waterway.

The Gemini hulls provide many advantages considering their weight and structural rigidity. The entire hull mold is one complete unit including the centerboard cases. This single unit eliminates any secondary bonding down the keel, at the bridge deck or around the centerboard cases making for a far stronger hull. The result - a faster, stronger, and more stable platform that provides excellent sailing performance.

## Layout & Accommodations

Master queen cabin forward and two double cabins aft. The saloon has a dinette settee with seating for six with upgraded upholstery. The dinette table easily converts into a berth for two. A roomy galley area with opposing work surfaces, double sink, refrigerator and propane stove with two burners, oven and broiler. Forward to port is a large head with counter space, washbasin and shower with two storage lockers. The cockpit is designed for great seating with easy ingress and egress facilitated by normal sized steps to the deck.
