

SHORT ON POLLUTION... LONG ON LUXURY

THE **CATAMARAN** COMPANY helps maintain the beauty of The British Virgin Islands by offering the option of less polluting hybrid catamarans for bareboat charter.

The yachting industry helps preserve the pristine environment of the Caribbean by providing a more environmentally friendly option for income to the islands than other alternatives like building large hotels and accommodating large numbers of cruise ships.

THE **CATAMARAN** COMPANY takes the concept a step further by providing the option of even lower polluting hybrid catamarans for bareboat charter so future generations can enjoy the islands too.

LAGOON 420 Hybrid

THE **CATAMARAN** COMPANY has two three cabin models and two four cabin models available for bareboat charter.
