Welcome to the future of high-end cruising cats. These are indeed exciting times in the multihull world. We introduce the carbon cruising cat with unbelievable boat speed.... SAIL MAGAZINE, May 2000

Twin dagger boards produce efficiency to windward and the ability to reduce drag off the wind. Twin helm stations are out in the open, aft of the huge cockpit. The boat can be handled with great simplicity and most operations can be carried out from the cockpit. The foredeck trampoline is comfortable for lounging. The 431's fit and finish are of a high standard and light colored interior is attractive and comfortable. An Engine speed of 2500 rpm returned 7 knots of sailing speed through the water. Low speed control is exceptional. Twenty-five knots of wind sets you charging at 9 knots under singled reefed main and full jib. With 8 knots of true wind, 6 knots is achieved. With 10 knots you can accomplish 8 knots. You just get the impression that the boat could point even higher without losing speed.

GUEST COMMENTS

We had a very good time - The boat sailed wonderfully. This adventure has been the best. The islands are fantastic

- Sewell - GA - Aug 2003

The cat was in great condition and handled very well. We thoroughly enjoyed the sailing.

- Huard - MA - Dec 2003

She is fast and we chose the Catana 431 as this is the only boat in Tortola like this in to charter. Great boat. Will be back!

- McCarthy, NY - Dec 2003
