New AC panel
Additional a/c units give you a total of 40,000 BTU

Engine & Mechanical

Efficiency is provided by the use of the powerful, yet economical, diesel engines balanced with efficient catamaran hulls. The ratio of power to speed for this size powerboat allows for offshore cruising and long passages that were once reserved for displacement boats.

Engines:
2 Diesel engines 2 x 184 HP
Straight propeller shafts
Twin engine controls at fly-bridge and at helm station
Soundproofed engine compartments
Air intakes on side of hull
Air exhausts on side of hull with fans
Raw water filter
Engine access under hull passageway floor and galley floor, ram lifters
Fuel filter per fuel circuit
fuel capacity 396 US gal.
